OFFSHORE ACCOMMODATION MODULES

FLEX20

FLEX 20

ACCOMMODATION MODULES

Our FLEX 20 modules are designed to provide longevity and low maintenance service in the most demanding locations. FLEX 20 modules are based on standard ISO 20ft dimensions in order to minimize mobilization costs, reduce footprint requirements onsite, while also providing a light weight, A60 rated solution for customers. Internal layouts can be customized and designed to meet client requirements. Regardless of the project location, we can provide a single unit or a complete complex solution that meets all necessary safety requirements for offshore. Options are available to meet various regulatory requirements depending on the project needs.
